REPORT OF INDEPENDENT ACCOUNTANTS TRANSLATED FROM CHINESE

To the Board of Directors and Stockholders of
Marketech International Corp.

## *Opinion*

We have audited the accompanying consolidated balance sheets of Marketech International Corp. and its subsidiaries (the "Group") as at December 31, 2017 and 2016, and the related consolidated statements of comprehensive income, of changes in equity and of cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2017 and 2016, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the "Regulations Governing the Preparations of Financial Reports by Securities Issuers" and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the Financial Supervisory Commission.

## *Basis for opinion*

We conducted our audits in accordance with the "Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants" and generally accepted auditing standards in the Republic of China (ROC GAAS). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the Code of Professional Ethics for Certified Public Accountants in the Republic of China (the "Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## *Key audit matters*

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the year ended December 31, 2017. These matters were addressed in the context of our audit of the consolidated financial statements as a whole and, in forming our opinion thereon, we do not provide a separate opinion on these matters.

### *Recognition of construction revenue*

Description

Please refer to Notes 4(13) and 4(29) for accounting policy on construction contract and revenue. Please refer to Note 5(2) for the details of uncertainty of construction contract accounting estimation and assumption. Please refer to Notes 6(22) and 6(6) for description on construction revenue and construction cost.

The Group recognized revenue and profit by using the percentage of completion method. This method is also being used to calculate the cost in each contract at the year-end. The management will re-evaluate the cost if the budget had increased or decreased, and depending on the cost after adjustment to recalculate the percentage of completion. The construction revenue may be affected by the appropriateness of determination of cost and estimated cost. Thus, we considered this as one of the key audit matters.

How our audit addressed the matter

We tailored the major audit scope as follows:

A. Obtained an understanding of the managements' control system and tested it, if the contract had been created or had significantly changed in estimation of construction cost.

B. Obtained the newly added construction contract list for this fiscal year, and ensure that the total contract price is equal to the amount being used to calculate construction revenue. Ensure that the construction supplement can be traced back to supplementary contracts.

C. Checked the construction cost estimation sheets incurred in the current period, sample tested the basis of estimation and subcontracting amount, and ensured it has been approved appropriately by the management.

D. Checked the rationality of significant changes in estimation of construction cost, and sample tested whether the revised plan has been approved by the management.

E. Obtained the billing details, and selected samples of related vouchers by using statistical procedures to check the correctness of input cost in engineering reports and computation of percentage of completion.

### *Valuation on inventories*

Description

Please refer to Note 4(12) for description of accounting policy on inventory valuation. Please refer to Note 5(2) for accounting estimates and assumption uncertainty in relation to inventory valuation. Please refer to Note 6(6) for the description of inventory.

The Group is primarily engaged in import and export trading business, which include integrated circuit, electronic equipment, and materials, components used on electronic equipment. Due to the rapid technological changes, the semiconductor equipment industry has become more and more competitive, and the product price frequently changes. Therefore, the Group is now exposed to risk on inventory valuation loss and slow-moving inventory. Inventories are stated at the lower of cost or net realizable value, slow-moving inventories are using specific identification method to estimate the allowance for inventory valuation losses.

The base stock of inventories are based on assumptions of future demand and development plan. Due to the large quantity of inventories for sale, and since the amounts involved are significant, the determination of net realisable value for obsolete or slow-moving inventory involves subjective judgement resulting in high degree of estimation uncertainty. As a result of the high uncertainties in these estimates, we considered this as one of the key audit matters.

How our audit addressed the matter

We tailored the major audit scope as follows:

A. Assessed the policy of allowance for inventory valuation loss, based on our understanding of the operations and industry of the Group.

B. Tested whether the basis of market value used in calculating the net realizable value of inventory is consistent with the policy of the Group and validated selling prices of selected samples of respective inventory and their accuracy of net realizable value calculation.

C. Acquired management's individually identified out-of-date inventory list, inspected the related supporting documents and proper recognition in the financial statements.

### *Valuation of allowance of accounts receivable*

Description

Please refer to Note 4(9) for accounting policy of accounts receivable. Please refer to Note 5(2) for accounting estimates and assumption uncertainty in relation to accounts receivable. Please refer to Note 6(5) for the description of accounts receivable.

First, the Group assessed the significant accounts receivable individually, and for those that are not significant can be assessed either individually or collectively. If there is no impairment after individual assessment, then the group of accounts receivable will be added for collective assessment. If the accounts receivable over a certain age is significant, the management will re-examine the collectability and assesses each case for possible impairment. Management uses professional judgement during the process, and accounting estimates have a high possibility of becoming inappropriate. The professional judgement may be affected by the following issues. Such as customer's financial status, internal credit rating, order history, and economic situation. Thus, obtaining the supporting documents which management used for judgement is important. Thus, we considered the assessment on allowance for bad debts as one of our key audit matters.

How our audit addressed the matter

We tailored the major audit scope as follows:

A. Obtained an understanding of the process which management used to evaluate the collectibility of accounts receivable.

B. Ensured that the classification of impairment in the group of accounts receivable is appropriate and in accordance with the Group's accounting policy.

C. Checked the details of significant impairment recognized by the management, against the supporting documents to verify appropriateness.

D. Verified the subsequent collections details of significant accounts receivable.

E. Obtained the details of significant accounts receivable which have not yet been collected at the year end, and re-evaluated the appropriateness.

### *Other matter – Parent company only financial reports*

We have audited and expressed an unqualified opinion on the parent company only financial statements of Marketech International Corp. Ltd. as at and for the years ended December 31, 2017 and 2016.

### *Responsibilities of management and those charged with governance for the consolidated financial statements*

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the "Regulations Governing the Preparations of Financial Reports by Securities Issuers" and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the Financial Supervisory Commission, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including audit committee, are responsible for overseeing the Group's financial reporting process.

### *Auditor's responsibilities for the audit of the consolidated financial statements*

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ROC GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ROC GAAS, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

pwc 資誠

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

| Annual improvements to IFRSs 2014-2016 cycle- Amendments to IAS 28, 'Investments in associates and joint ventures' | January 1, 2018 |

Except for the following, the above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

A. IFRS 9, 'Financial instruments'

(a) Classification of debt instruments is driven by the entity's business model and the contractual cash flow characteristics of the financial assets, which would be classified as financial asset at fair value through profit or loss, financial asset measured at fair value through other comprehensive income or financial asset measured at amortised cost. Equity instruments would be classified as financial asset at fair value through profit or loss, unless an entity makes an irrevocable election at inception to present in other comprehensive income subsequent changes in the fair value of an investment in an equity instrument that is not held for trading.

(b) The impairment losses of debt instruments are assessed using an 'expected credit loss' approach. An entity assesses at each balance sheet date whether there has been a significant increase in credit risk on that instrument since initial recognition to recognise 12-month expected credit losses or lifetime expected credit losses (interest revenue would be calculated on the gross carrying amount of the asset before impairment losses occurred); or if the instrument that has objective evidence of impairment, interest revenue after the impairment would be calculated on the book value of net carrying amount (i.e. net of credit allowance). The Group shall always measure the loss allowance at an amount equal to lifetime expected credit losses for trade receivables that do not contain a significant financing component.

B. IFRS 15, 'Revenue from contracts with customers'

IFRS 15, 'Revenue from contracts with customers' replaces IAS 11, 'Construction contracts', IAS 18 'Revenue' and relevant interpretations. According to IFRS 15, revenue is recognised when a customer obtains control of promised goods or services. A customer obtains control of goods or services when a customer has the ability to direct the use of, and obtain substantially all of the remaining benefits from, the asset.

The core principle of IFRS 15 is that an entity recognises revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. An entity recognises revenue in accordance with that core principle by applying the following steps:

Step 1: Identify contracts with customer.

Step 2: Identify separate performance obligations in the contract(s).

Step 3: Determine the transaction price.

Step 4: Allocate the transaction price.

Step 5: Recognise revenue when the performance obligation is satisfied.

Further, IFRS 15 includes a set of comprehensive disclosure requirements that requires an entity to disclose sufficient information to enable users of financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers.

When adopting the new standards endorsed by the FSC effective from 2018, the Group will apply the new rules under IFRS 9 retrospectively from January 1, 2018, with the practical expedients permitted under the statement. Further, the Group expects to adopt IFRS 15 using the modified retrospective approach. The significant effects of applying the new standards as of January 1, 2018 are summarized below:

A. In accordance with IFRS 9, the Group expects to reclassify available-for-sale financial assets and financial assets at cost in the amounts of $41,502 and $279,343 respectively, by increasing financial assets at fair value through profit or loss and increasing retained earnings and decreasing other equity interest in the amounts of $346,649, $48,817 and $23,013, respectively.

B. In line with the regulations of IFRS 9 on provision for impairment, account receivables will have to be reduced by $29,297, retained earnings decreased by $29,502 and non-controlling interests increased by $205.

C. Presentation of contract assets and contract liabilities

In line with IFRS 15 requirements, the Group expects to change the presentation of certain accounts in the balance sheets as follows:

(a)Under IFRS 15, construction contracts whereby services have been rendered but not yet billed are recognised as contract assets but were previously presented as construction contracts receivable in the balance sheet. The balances would amount to $3,163,858 on January 1, 2018.

(b)Under IFRS 15, liabilities in relation to construction contracts are recognised as contract liabilities, but were previously presented as construction contracts payable in the balance sheet. The balances would amount to $1,851,105 on January 1, 2018, reclassified to contract liabilities-current.

(c) Under IFRS 15, liabilities in relation to sales contracts are recognised as contract liabilities, but were previously presented as advance receipts in the balance sheet. The balances would amount to $961,752 on January 1, 2018, reclassified to contract liabilities-current.

(3) IFRSs issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRSs as endorsed by the FSC are as follows:

| New Standards, Interpretations and Amendments | Effective date by International Accounting Standards Board |
|---|---|
| Amendments to IFRS 9, 'Prepayment features with negative | January 1, 2019 |
| Amendments to IFRS 10 and IAS 28, 'Sale or contribution of assets between an investor and its associate or joint venture' | To be determined by International Accounting Standards Board |
| IFRS 16, 'Leases' | January 1, 2019 |
| IFRS 17, 'Insurance contracts' | January 1, 2021 |
| Amendments to IAS 19, 'Plan amendment, curtailment or settlement' | January 1, 2019 |
| Amendments to IAS 28, 'Long-term interests in associates and joint | January 1, 2019 |
| IFRIC 23, 'Uncertainty over income tax treatments' | January 1, 2019 |
| Annual improvements to IFRSs 2015-2017 cycle | January 1, 2019 |

Except for the following, the above standards and interpretations have no significant impact to the Group’s financial condition and financial performance based on the Group’s assessment. The quantitative impact will be disclosed when the assessment is complete.

A. IFRS 16, ‘Leases’

IFRS 16, ‘Leases’, replaces IAS 17, ‘Leases’ and related interpretations and SICs. The standard requires lessees to recognise a ‘right-of-use asset’ and a lease liability (except for those leases with terms of 12 months or less and leases of low-value assets). The accounting stays the same for lessors, which is to classify their leases as either finance leases or operating leases and account for those two types of leases differently. IFRS 16 only requires enhanced disclosures to be provided by lessors.

B. Amendments to IAS 28, ‘Long-term interests in associates and joint ventures’

The amendment clarifies that, for any long-term interest that, in substance, form part of the entity's net investment in an associate or joint venture, an entity should apply IFRS 9 to such interests before it applies IAS 28 to recognise losses.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1) Statement of compliance

The consolidated financial statements of the Group have been prepared in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers”, International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the “IFRSs”).

(2) Basis of preparation

A. Except for the following items, the consolidated financial statements have been prepared under the historical cost convention:

(a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.

(b) Available-for-sale financial assets measured at fair value.

(c) Liabilities on cash-settled share-based payment arrangements measured at fair value.

(d) Defined benefit liabilities recognised based on the net amount of pension fund assets less present value of defined benefit obligation.

B. The preparation of financial statements in conformity with IFRSs requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group’s accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.

(3) Basis of consolidation

A. Basis for preparation of consolidated financial statements:

(a) All subsidiaries are included in the Group's consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.

(b) Inter-company transactions, balances and unrealised gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Group.

(c) Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

(d) Changes in a parent's ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity.

(e) When the Group loses control of a subsidiary, the Group remeasures any investment retained in the former subsidiary at its fair value. That fair value is regarded as the fair value on initial recognition of a financial asset or the cost on initial recognition of the associate or joint venture. Any difference between fair value and carrying amount is recognised in profit or loss. All amounts previously recognised in other comprehensive income in relation to the subsidiary are reclassified to profit or loss on the same basis as would be required if the related assets or liabilities were disposed of. That is, when the Group loses control of a subsidiary, all gains or losses previously recognised in other comprehensive income in relation to the subsidiary should be reclassified from equity to profit or loss, if such gains or losses would be reclassified to profit or loss when the related assets or liabilities are disposed of.

Note : The Company holds less than 50% share ownership in its subsidiary – SKMIC (Wuxi) Corp., however, as the definition of control is met, the subsidiary is included in the consolidated entities.

C. Subsidiaries not included in the consolidated financial statements: None.

D. Adjustments for subsidiaries with different balance sheet dates: None.

E. Significant restrictions: None.

F. Subsidiaries that have non-controlling interests that are material to the Group: As of December 31, 2017 and 2016, the non-controlling interests amounted to ($975), and ($2,416), respectively. Subsidiaries that have non-controlling interests are not material to the Group.

(4) Foreign currency translation

Items included in the financial statements of each of the Group’s entities are measured using the currency of the primary economic environment in which the entity operates (the “functional currency”). The consolidated financial statements are presented in New Taiwan dollars (NTD), which is the Company’s functional and the Group’s presentation currency.

A. Foreign currency transactions and balances

(a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognized in profit or loss in the period in which they arise.

(b) Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognized in profit or loss.

(c) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognized in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognized in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.

(d) Foreign exchange gains and loss based on the nature of those transactions are presented in the statement of comprehensive income within other gains and losses.

B. Translation of foreign operations

(a) The operating results and financial position of all the group entities, associates and joint arrangements that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

i . Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;

ii. Income and expenses for each statement of comprehensive income are translated at average exchange rates of that period; and

iii. All resulting exchange differences are recognised in other comprehensive income.

(b) When the foreign operation partially disposed of or sold is an associate or joint arrangements, exchange differences that were recorded in other comprehensive income are proportionately reclassified to profit or loss as part of the gain or loss on sale. In addition, even when the Group still retains partial interest in the former foreign associate or joint arrangements after losing significant influence over the former foreign associate, or losing joint control of the former joint arrangements, such transactions should be accounted for as disposal of all interest in these foreign operations.

(c) When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, even when the Group still retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.

(d) Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing exchange rates at the balance sheet date.

(5) <u>Classification of current and non-current items</u>

A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:

(a) Assets arising from operating activities that are expected to be realized, or are intended to be sold or consumed within the normal operating cycle;

(b) Assets held mainly for trading purposes;

(c) Assets that are expected to be realized within twelve months from the balance sheet date;

(d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to pay off liabilities more than twelve months after the balance sheet date.

B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:

(a) Liabilities that are expected to be paid off within the normal operating cycle;

(b) Liabilities arising mainly from trading activities;

(c) Liabilities that are to be paid off within twelve months from the balance sheet date;

(d) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

C. Assets and liabilities relating to undertaking construction are classified as a current and non-current based on operating cycle.

(6) Cash equivalents

A. Cash and cash equivalents include petty cash, bank deposits and other short-term and highly liquid investments in the statements of cash flows.

B. Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Time deposits that meet the definition above and are held for the purpose of meeting short-term cash commitments in operations are classified as cash equivalents.

(7) Financial assets at fair value through profit or loss

A. Financial assets at fair value through profit or loss are financial assets held for trading or financial assets designated as at fair value through profit or loss on initial recognition. Financial assets are classified in this category of held for trading if acquired principally for the purpose of selling in the short-term.

B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognized and derecognized using settlement date accounting.

C. Financial assets at fair value through profit or loss are initially recognized at fair value. Related transaction costs are expensed in profit or loss. These financial assets are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial assets are recognized in profit or loss.

(8) Available-for-sale financial assets

A. Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories.

B. On a regular way purchase or sale basis, available-for-sale financial assets are recognized and derecognized using trade date accounting.

C. Available-for-sale financial assets are initially recognized at fair value plus transaction costs. These financial assets are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial assets are recognized in other comprehensive income. Investments in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured or derivatives that are linked to and must be settled by delivery of such unquoted equity instruments are presented in 'financial assets measured at cost'.

(9) Notes and accounts receivable

Accounts receivable are loans and receivables originated by the entity. They are created by the entity by selling goods or providing services to customers in the ordinary course of business. Accounts receivable are initially recognized at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment. However, short-term accounts receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(10) Impairment of financial assets

A. The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

B. The criteria that the Group uses to determine whether there is objective evidence of an impairment loss is as follows:

(a) Significant financial difficulty of the issuer or debtor;

(b) A breach of contract, such as a default or delinquency in interest or principal payments;

(c) The Group, for economic or legal reasons relating to the borrower's financial difficulty, granted the borrower a concession that a lender would not otherwise consider;

(d) It becomes probable that the borrower will enter bankruptcy or other financial reorganisation;

(e) The disappearance of an active market for that financial asset because of financial difficulties;

(f) Observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial asset in the group, including adverse changes in the payment status of borrowers in the group or national or local economic conditions that correlate with defaults on the assets in the group;

(g) Information about significant changes with an adverse effect that have taken place in the technology, market, economic or legal environment in which the issuer operates, and indicates that the cost of the investment in the equity instrument may not be recovered;

(h) A significant or prolonged decline in the fair value of an investment in an equity instrument below its cost.

C. When the Group assesses that there has been objective evidence of impairment and an impairment loss has occurred, accounting for impairment is made as follows according to the category of financial assets:

(a) Financial assets measured at amortised cost

The amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate, and is recognised in profit or loss. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment loss was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the asset does not exceed its amortised cost that would have been at the date of reversal had the impairment loss not been recognised previously. Impairment loss is recognised and reversed by adjusting the carrying amount of the asset through the use of an impairment allowance account.

(b) Financial assets measured at cost

The amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at current market return rate of similar financial asset, and is recognised in profit or loss. Impairment loss recognised for this category shall not be reversed subsequently. Impairment loss is recognised by adjusting the carrying amount of the asset directly.

(c) Available-for-sale financial assets

The amount of the impairment loss is measured as the difference between the asset's acquisition cost (less any principal repayment and amortisation) and current fair value, less any impairment loss on that financial asset previously recognised in profit or loss, and is reclassified from 'other comprehensive income' to 'profit or loss'. If, in a subsequent period, the fair value of an investment in a debt instrument increases, and the increase can be related objectively to an event occurring after the impairment loss was recognised, then such impairment loss is reversed through profit or loss. Impairment loss of an investment in an equity instrument recognised in profit or loss shall not be reversed through profit or loss. Impairment loss is recognised and reversed by adjusting the carrying amount of the asset through the use of an impairment allowance account.

(11) Derecognition of financial assets

The Group derecognizes a financial asset when the contractual rights to receive the cash flows from the financial asset expire.

(12) Inventories

Inventories are stated at the lower of cost and net realizable value. Cost is determined using the weighted-average method. The cost of finished goods and work in progress comprises raw materials, direct labour, other direct costs and related production overheads (allocated based on normal operating capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable variable selling expenses.

(13) Construction contracts

A. IAS 11, ‘Construction Contracts’, defines a construction contract as a contract specifically negotiated for the construction of an asset. If the outcome of a construction contract can be estimated reliably and it is probable that this contract would make a profit, contract revenue should be recognized by reference to the stage of completion of the contract activity, using the percentage-of-completion method of accounting, over the contract term. Contract costs are expensed as incurred. The stage of completion of a contract is measured by the proportion of contract costs incurred for work performed to date to the estimated total costs for the contract. An expected loss where total contract costs will exceed total contract revenue on a construction contract should be recognized as an expense as soon as such loss is probable. If the outcome of a construction contract cannot be estimated reliably, contract revenue should be recognized only to the extent of contract costs incurred that it is probable will be recoverable.

B. Contract revenue should include the revenue arising from variations from the original contract work, claims and incentive payments that are agreed by the customer and can be measured reliably.

C. The excess of the cumulative costs incurred plus recognized profits (less recognized losses) over the progress billings on each construction contract is presented as an asset within ‘receivables from customers on construction contracts’. While, the excess of the progress billings over the cumulative costs incurred plus recognized profits (less recognized losses) on each construction contract is presented as a liability within ‘Construction contracts payable’.

(14) Investments accounted for using equity method / associates

A. Associates are all entities over which the Group has significant influence but not control. In general, it is presumed that the investor has significant influence, if an investor holds, directly or indirectly 20 percent or more of the voting power of the investee. Investments in associates are accounted for using the equity method and are initially recognized at cost.

B. The Group’s share of its associates’ post-acquisition profits or losses is recognised in profit or loss, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income. When the Group’s share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.

C. When changes in an associate's equity that are not recognised in profit or loss or other comprehensive income of the associate and such changes not affecting the Group's ownership percentage of the associate, the Group recognises change in ownership interests in the associate in 'capital surplus' in proportion to its ownership.

D. Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been adjusted where necessary to ensure consistency with the policies adopted by the Group.

E. In the case that an associate issues new shares and the Group does not subscribe or acquire new shares proportionately, which results in a change in the Group's ownership percentage of the associate but maintains significant influence on the associate, then 'capital surplus' and 'investments accounted for under the equity method' shall be adjusted for the increase or decrease of its share of equity interest. If the above condition causes a decrease in the Group's ownership percentage of the associate, in addition to the above adjustment, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately on the same basis as would be required if the relevant assets or liabilities were disposed of.

F. Upon loss of significant influence over an associate, the Group remeasures any investment retained in the former associate at its fair value. Any difference between fair value and carrying amount is recognised in profit or loss.

G. When the Group disposes its investment in an associate, if it loses significant influence over this associate, the amounts previously recognised in other comprehensive income in relation to the associate, are reclassified to profit or loss, on the same basis as would be required if the relevant assets or liabilities were disposed of. If it still retains significant influence over this associate, then the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately in accordance with the aforementioned approach.

H. When the Group disposes its investment in an associate, if it loses significant influence over this associate, the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss. If it still retains significant influence over this associate, then the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss proportionately.

(15) Property, plant and equipment

A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalized.

B. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

C. Land is not depreciated. Other property, plant and equipment apply cost model and are depreciated using the straight-line method to allocate their cost over their estimated useful lives. Each part of an item of property, plant, and equipment with a cost that is significant in relation to the total cost of the item must be depreciated separately.

D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year-end. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change. The estimated useful lives of property, plant and equipment are as follows:

| | |
|---|---|
| Buildings | 2 ~ 55 years |
| Machinery and equipment | 3 ~ 15 years |
| Other equipment | 2 ~ 10 years |

(16) Leases (leasee)

Payments made under an operating lease (net of any incentives received from the lessor) are recognized in profit or loss on a straight-line basis over the lease term.

(17) Intangible assets

A. Computer software

Computer software is stated at cost and amortized on a straight-line basis over its estimated useful life of 1 to 3 years.

B. Trademarks

Trademarks are acquired in a business combination.

C. Other intangible assets

Other intangible assets are technology royalties which are stated at cost and amortised on a straight-line basis over the contract duration.

(18) Impairment of non-financial assets

A. The Group assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. Except for goodwill, when the circumstances or reasons for recognizing impairment loss for an asset in prior years no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortized historical cost would have been if the impairment had not been recognized.

B. Goodwill is evaluated annually and is recorded as cost less impairment loss. Impairment loss of goodwill shall not be reversed.

C. For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the cash-generating units, or groups of cash-generating units, that is/are expected to benefit from the synergies of the business combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

(19) Borrowings

Borrowings are recognized initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognized in profit or loss over the period of the borrowings using the effective interest method.

(20) Notes and accounts payable

Notes and accounts payable are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. They are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method. However, short-term accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(21) Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability specified in the contract is discharged or cancelled or expires.

(22) Financial liabilities and equity instruments

Convertible corporate bonds issued by the Company contain conversion options (that is, the bondholders have the right to convert the bonds into the Company’s common shares by exchanging a fixed amount of cash for a fixed number of common shares), call options and put options. The Company classifies the bonds payable and derivative features embedded in convertible corporate bonds on initial recognition as a financial asset, a financial liability or an equity instrument (‘capital surplus - stock options’) in accordance with the substance of the contractual arrangement and the definitions of a financial asset, a financial liability and an equity instrument. Convertible corporate bonds are accounted for as follows:

A. Call options and put options embedded in convertible corporate bonds are recognized initially at net fair value as ‘financial assets or financial liabilities at fair value through profit or loss’. They are subsequently remeasured and stated at fair value on each balance sheet date; the gain or loss is recognized as ‘gain or loss on valuation of financial assets or financial liabilities at fair value through profit or loss’.

B. Bonds payable of convertible corporate bonds is initially recognised at fair value and subsequently stated at amortised cost. Any difference between the proceeds and the redemption value is accounted for as the premium or discount on bonds payable/ preference share liabilities and presented as an addition to or deduction from bonds payable, which is amortised in profit or loss as an adjustment to the 'finance costs' over the period of bond circulation using the effective interest method.

C. Conversion options embedded in convertible corporate bonds issued by the Company, which meet the definition of an equity instrument, are initially recognized in 'capital surplus - stock options' at the residual amount of total issue price less amounts of 'financial assets or financial liabilities at fair value through profit or loss' and 'bonds payable - net' as stated above. Conversion options are not subsequently remeasured.

D. Any transaction costs directly attributable to the issuance of convertible corporate bonds are allocated to the liability and equity components in proportion to the allocation of proceeds.

E. When bondholders exercise conversion options, the liability component of the bonds (including 'bonds payable' and 'financial assets or financial liabilities at fair value through profit or loss') shall be remeasured on the conversion date. The book value of common shares issued due to the conversion shall be based on the adjusted book value of the above-mentioned liability component plus the book value of capital surplus - stock options.

(23) Financial guarantee contracts

A financial guarantee contract is a contract that requires the Group to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument. A financial guarantee contract is initially recognized at its fair value adjusted for transaction costs on the trade date. After initial recognition, the financial guarantee is measured at the higher of the initial fair value less cumulative amortization and the best estimate of the amount required to settle the present obligation on each balance sheet date.

(24) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognized as expenses in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognised as pension expenses when they are due on an accrual basis. Prepaid contributions are recognised as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

i. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Group in current period or prior periods. The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The defined benefit net obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of government bonds (at the balance sheet date) of a currency and term consistent with the currency and term of the employment benefit obligations.

ii. Remeasurement arising on defined benefit plans are recognised in other comprehensive income in the period in which they arise and are recorded as retained earnings.

iii. Past-service costs are recognised immediately in profit or loss.

C. Employees' compensation and directors' and supervisors' remuneration

Employees' compensation and directors' and supervisors' remuneration are recognized as expenses and liabilities, provided that such recognition is required under legal obligation or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates.

(25) Employee share-based payment

For the equity-settled share-based payment arrangements, the employee services received are measured at the fair value of the equity instruments granted at the grant date, and are recognized as compensation cost over the vesting period, with a corresponding adjustment to equity. The fair value of the equity instruments granted shall reflect the impact of market vesting conditions and non-market vesting conditions. Compensation cost is subject to adjustment based on the service conditions that are expected to be satisfied and the estimates of the number of equity instruments that are expected to vest under the non-market vesting conditions at each balance sheet date. And ultimately, the amount of compensation cost recognized is based on the number of equity instruments that eventually vest.

(26) Income tax

A. The tax expense for the period comprises current and deferred tax. Tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or items recognized directly in equity, in which cases the tax is recognized in other comprehensive income or equity.

B. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional 10% tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.

C. Deferred tax is recognized, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated balance sheet. However, the deferred tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.

D. Deferred tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. At each balance sheet date, unrecognized and recognized deferred tax assets are reassessed.

E. Current income tax assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. Deferred tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realize the asset and settle the liability simultaneously.

F. A deferred tax asset shall be recognized for the carryforward of unused tax credits resulting from acquisitions of equipment or technology, research and development expenditures and equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilized.

(27) <u>Share capital</u>

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or stock options are shown in equity as a deduction, net of tax, from the proceeds.

(28) <u>Dividends</u>

Dividends are recorded in the Company’s financial statements in the period in which they are approved by the Company’s shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares on the effective date of new shares issuance.

(29) Revenue recognition

A. Construction revenue

Details of construction revenue are provided in Note 4(13).

B. Sales of goods

Revenue is measured at the fair value of the consideration received or receivable for the sale of goods (products) to external customers in the ordinary course of the Group's activities. Revenue arising from the sales of goods should be recognised when the Group has delivered the goods to the customer, the amount of sales revenue can be measured reliably and it is probable that the future economic benefits associated with the transaction will flow to the entity. The delivery of goods (products) is completed when the significant risks and rewards of ownership have been transferred to the customer, the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods (products) sold, and the customer has accepted the goods based on the sales contract or there is objective evidence showing that all acceptance provisions have been satisfied.

(30) Business combinations

A. The Group uses the acquisition method to account for business combinations. The consideration transferred for an acquisition is measured as the fair value of the assets transferred, liabilities incurred or assumed and equity instruments issued at the acquisition date, plus the fair value of any assets and liabilities resulting from a contingent consideration arrangement. All acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. For each business combination, the Group measures at the acquisition date components of non-controlling interests in the acquiree that are present ownership interests and entitle their holders to the proportionate share of the entity's net assets in the event of liquidation at either fair value or the present ownership instruments' proportionate share in the recognised amounts of the acquiree's identifiable net assets. All other non-controlling interests should be measured at the acquisition-date fair value.

B. The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of any previous equity interest in the acquiree over the fair value of the identifiable assets acquired and the liabilities assumed is recorded as goodwill at the acquisition date. If the total of consideration transferred, non-controlling interest in the acquiree recognised and the fair value of previously held equity interest in the acquiree is less than the fair value of the identifiable assets acquired and the liabilities assumed, the difference is recognised directly in profit or loss on the acquisition date.

(31) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision-Maker. The Group's Chief Operating Decision-Maker is responsible for allocating resources and assessing performance of the operating segments.

5. CRITICAL ACCOUNTING JUDGEMENTS, ESTIMATES AND KEY SOURCES OF ASSUMPTION UNCERTAINTY

The preparation of these consolidated financial statements requires management to make critical judgements in applying the Group's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such assumptions and estimates have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year; and the related information is addressed below:

(1) Critical judgements in applying the Company's accounting policies

None.

(2) Critical accounting estimates and assumptions

A. Construction contract

The Company recognises contract revenue and profit based on management's evaluation to contract profit and percentage of completion. Management assesses and adjusts the contract profit and cost during execution of the contract. The actual result of the total profit and cost may be higher or lower than the estimation, and the effect is recognised in revenue and profit.

B. Evaluation of inventories

As inventories are stated at the lower of cost and net realisable value, the Company must determine the net realisable value of inventories on balance sheet date using judgements and estimates. Due to the rapid technology innovation, the Company evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realisable value. Such an evaluation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be material changes to the evaluation.

C. Assessing the doubtful accounts

During the process of assessing the doubtful accounts, the Group uses judgement and evaluation to consider collectibility. The collectibility assessment is affected by various factors: customers' financial conditions, historical transaction records, current economic conditions, etc. If the collectibility of those accounts is in doubt, the Group will recognize allowance for uncollectible accounts individually. The evaluation of allowance is based on the status as of balance sheets date for reasonable expectations of future events. However, the actual results may be different than estimation. Therefore, it may have significant changes.

| Bonds payable | $ | 206,100 | $ | 500,000 |
| Less: Discount on bonds payable | ( | 5,901) | ( | 22,847) |
| Total | $ | 200,199 | $ | 477,153 |

A. The Company issued the 3rd domestic unsecured convertible bonds, as approved by the regulatory authority on August 1, 2016. The terms and conditions are as follows:

(a) Total issuance amount: NT $500,000

(b) Issuance period: 3 years, and a circulation period from August 22, 2016 to August 22, 2019.

(c) Coupon rate: 0%

(d) Conversion period: The bondholders have the right to ask for conversion of the bonds into common shares of the Company during the period from the date after one month of the bonds before the maturity date, except the stop transfer period as specified in the terms of the bonds or the laws/regulations. The rights and obligations of the new shares converted from the bonds are the same as the issued and outstanding common shares.

(e) The conversion price of the bonds is set up based on the pricing model in the terms of the bonds, and is subject to adjustments if the condition of the anti-dilution provisions occurs subsequently. The conversion price will be reset based on the pricing model in the terms of the bonds on each effective date regulated by the terms. If the reset conversion price is higher than the conversion price before the reset, the conversion price will not be adjusted.

(f) Redemption Method:

i. Redemption on the maturity date: Redeemed in cash at face value at the maturity date.

ii. Redemption before the maturity date: The Company may repurchase all the bonds outstanding in cash at the bonds' face value at any time after the following events occur: (i) the closing price of the Company common shares is above the then conversion price by 30% for 30 consecutive trading days during the period from the date after one month of the bonds issue to 40 days before the maturity date, or (ii) the outstanding balance of the bonds is less than 10% of total initial issue amount during the period from the date after one month of the bonds issue to 40 days before the maturity date.

iii. Under the terms of the bonds, all bonds redeemed, matured and converted are retired and not to be re-issued; all rights and obligations attached to the bonds are also extinguished.

(g) As of December 31, 2017, the convertible corporate bonds with par value totaling $293,900 have been converted into 10,524 thousand ordinary shares, generating capital surplus of $188,751 and resulting in a decrease of 'capital surplus - stock options' by $12,424.

B. Regarding the issuance of convertible bonds, the equity conversion options amounting to $21,136 were separated from the liability component and were recognised in 'capital surplus - stock options' in accordance with IAS 32. The call options embedded in bonds payable were separated from their host contracts and were recognised in 'financial assets or liabilities at fair value through profit or loss' in net amount in accordance with IAS 39 because the economic characteristics and risks of the embedded derivatives were not closely related to those of the host contracts. The effective interest rates of the bonds payable after such separation is 1.788%.

(17) Pensions

A.(a) The Company has a defined benefit pension plan in accordance with the Labor Standards Law, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Law. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months prior to retirement. The Company contributes monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company would assess the balance in the aforementioned labor pension reserve account by the end of December 31, every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method, to the employees expected to be qualified for retirement next year, the Company will make contributions to cover the deficit by next March.

(d) The Bank of Taiwan was commissioned to manage the Fund of the Company's and domestic subsidiaries' defined benefit pension plan in accordance with the Fund's annual investment and utilization plan and the "Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund" (Article 6: The scope of utilization for the Fund includes deposit in domestic or foreign financial institutions, investment in domestic or foreign listed, over-the-counter, or private placement equity securities, investment in domestic or foreign real estate securitization products, etc.). With regard to the utilization of the Fund, its minimum earnings in the annual distributions on the final financial statements shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. If the earnings is less than aforementioned rates, government shall make payment for the deficit after being authorized by the Regulator. The Company has no right to participate in managing and operating that fund and hence the Company is unable to disclose the classification of plan asset fair value in accordance with IAS 19 paragraph 142. The composition of fair value of plan assets as of December 31, 2017 and 2016 is given in the Annual Labor Retirement Fund Utilization Report announced by the government.

(e) The principal actuarial assumptions used were as follows:

| | Years ended December 31, | |
|---|---|---|
| | 2017 | 2016 |
| Discount rate | 1.25% | 1.50% |
| Future salary increases | 2.00% | 2.00% |

Assumptions regarding future mortality experience are set based on the 5th Taiwan Standard Ordinary Experience Mortality Table.

Because the main actuarial assumption changed, the present value of defined benefit obligation is affected. The analysis was as follows:

| | Discount rate | | Future salary increases | |
|---|---|---|---|---|
| | Increase 0.25% | Decrease 0.25% | Increase 0.25% | Decrease 0.25% |
| December 31, 2017 | | | | |
| Effect on present value of defined benefit obligation | ($ 8,626) | $ 9,011 | $ 8,921 | ($ 8,584) |
| December 31, 2016 | | | | |
| Effect on present value of defined benefit obligation | ($ 8,570) | $ 8,969 | $ 8,901 | ($ 8,549) |

The sensitivity analysis above is based on other conditions that are unchanged but only one assumption is changed. In practice, more than one assumption may change all at once. The method of analysing sensitivity and the method of calculating net pension liability in the balance sheet are the same.

The method and assumptions used for the preparation of sensitivity analysis during 2017 and 2016 are the same.

(f) Expected contributions to the defined benefit pension plans of the Company for the year ending December 31, 2018 amounts to $6,040.

(g) As of December 31, 2017, the weighted average duration of the defined benefit retirement plan is 12 years.

B. (a) Effective July 1, 2005, the Company has established a defined contribution pension plan (the "New Plan") under the Labor Pension Act (the "Act"), covering all regular employees with R.O.C. nationality. Under the New Plan, the Company contributes monthly an amount based on 6% of the employees' monthly salaries and wages to the employees' individual pension accounts at the Bureau of Labor Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment.

(b) The Company's Mainland China subsidiaries have a defined contribution plan. Monthly contributions to an independent fund administered by the government in accordance with the pension regulations in the People's Republic of China (PRC) are based on certain percentage of employees' monthly salaries and wages. Other than the monthly contributions, the Group has no further obligations.

(c) Certain overseas subsidiaries have a defined contribution plan. Contributions to an independent fund are based on certain percentage of employees' monthly salaries and wages and are recognised as pension cost. Other than the monthly contributions, the Group has no further obligations.

(d) The pension costs under the defined contribution pension plans of the Company for the years ended December 31, 2017 and 2016 were $89,738 and $89,003, respectively.

(18) Share-based payment

A. For the years ended December 31, 2017 and 2016, the Company's share-based payment arrangements were as follows:

C. The expiry date and exercise price of stock options outstanding at balance sheet date are as follows:

| | | December 31, 2017 | |
|---|---|---|---|
| Issue date approved | Expiry date | No. of shares (in thousands) | Exercise price (in dollars) |
| 2015.9.11 | 2021.9.10 | 2,456 | $ 17.30 |

| | | December 31, 2016 | |
|---|---|---|---|
| Issue date approved | Expiry date | No. of shares (in thousands) | Exercise price (in dollars) |
| 2015.9.11 | 2021.9.10 | 3,956 | $ 18.20 |

D. The fair value of stock options granted on grant date is measured using the Black-Scholes option-pricing model. Relevant information is as follows:

| Type of arrangement | Grant date | Stock price (in dollars) | Exercise price (in dollars) | Expected price volatility | Expected option life | Expected dividends | Risk-free interest rate | Fair value per unit (in dollars) |
|---|---|---|---|---|---|---|---|---|
| Employee stock options | 2015.9.11 | $ 19.60 | $ 19.60 | 34.91% | 4.375 years | 0% | 0.81% | $ 5.8326 |

E. Expenses incurred on share-based payment transactions are $7,901 and $8,537 for the years ended December 31, 2017 and 2016, respectively.

(19) Share capital

As of December 31, 2017, the Company’s authorized capital was $2,500,000, consisting of 250 million shares of ordinary stock (including 9,800 thousand shares reserved for employee stock options), and the paid-in capital was $1,770,164 with a par value of $10 (in dollars) per share amounting to 177,016,429 shares. | Exercise of employee stock options | 1,422,500 | - |
| At December 31 | 177,016,429 | 165,069,756 |

(20) Capital surplus

Pursuant to the R.O.C. Company Act, capital surplus arising from paid-in capital in excess of par value on issuance of common stocks and donations can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Further, the R.O.C. Securities and Exchange Act requires that the amount of capital surplus to be capitalised mentioned above should not exceed 10% of the paid-in capital each year. Capital surplus should not be used to cover accumulated deficit unless the legal reserve is insufficient.

Details of movements in capital surplus are as follows:

| | Year ended December 31, 2017 | | | | |
|---|---|---|---|---|---|
| | Share premium | Employee Stock options | Stock options | Others | Total |

(21) Retained earnings

A. Under the Company's Articles of Incorporation, the current year's earnings, if any, shall first be used to pay all taxes and offset prior years' operating losses and then 10% of the remaining amount shall be set aside as legal reserve and special reserve. The remaining amount along with the prior years' unappropriated earnings are resolved by the Board of Directors and proposed to the stockholders for appropriation or reserve.

B. The Company's dividend policy is summarized below: in consideration of the overall environment development and industrial growth, fulfilling future operation development needs as priority and optimizing financial structure, distribution of dividends shall not exceed 50% of the stock dividend distributed.

C. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the distribution of the reserve is limited to the portion in excess of 25% of the Company's paid-in capital.

D. (a) In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.

(b) The amounts previously set aside by the Company as special reserve on initial application of IFRSs in accordance with Financial-Supervisory-Securities-Firms No. 1010012865, dated April 6, 2012, shall be reversed proportionately when the relevant assets are used, disposed of or reclassified subsequently.

E. (a) Details of 2016 and 2015 earnings appropriation resolved by the stockholders on May 26, 2017 and May 31, 2016, respectively are as follows:

| | Years ended December 31, | | | |

(1) For details of 2017 earnings appropriation proposed by the Board of Directors on February 24, 2018, please refer to Note 6(21) E(b).

(2) The amendments to the Income Tax Act were promulgated by the President of the Republic of China on February 7, 2018, and went into effect on January 1, 2018. The material effects to the Company are described as follows:

A. The Company's applicable income tax rate will be raised from 17% to 20% effective from January 1, 2018. This will increase both the Company's deferred tax assets and deferred tax liabilities by 3%, and (decrease) increase current income tax expenses accordingly.

B. The imputation tax system will be abolished, thus, the balance of the imputation credit account on December 31, 2017 will become $0 as of January 1, 2018.

12. OTHERS

(1) Capital risk management

The Group's main objective when managing capital is to maintain an optimal credit ranking and capital ratio to support the operation and to maximize stockholders' equity.

(2) Financial instruments

A. Fair value information of financial instruments

The carrying amounts of the Group's financial instruments not measured at fair value are including cash and cash equivalents, notes receivable, accounts receivable (including related parties), construction contracts receivable (including related parties), other receivables (including related parties), other financial assets (recorded as 'other current assets'), refundable deposits (recorded as 'other non-current assets'), short-term borrowings, notes payable, accounts payable (including related parties), construction contracts payable (including related parties), other payables, long-term borrowings (including current portion) and guarantee deposits received (recorded as 'other non-current liabilities, others') are approximate to their fair values. The fair value information of financial instruments measured at fair value is provided in Note 12(3).

B. Financial risk management policies

The Group's financial risk mainly arises from risks along with investments in financial instruments and foreign exchange risk of foreign currency transactions. The Group always adopt the restricted control standard for financial risk of all investments in financial instruments that market risk, credit risk, liquidity risk and cash flow risk of any financial investment and implementation has to be assessed and the ones with the least risks are chosen. For foreign exchange risk of foreign currency transactions based on strategic risk management objectives, the Group seeks the most optimised risk position and maintain appropriate liquidity position to reach the best hedging strategy.

C. Significant financial risks and degrees of financial risks

(a) Market risk

Foreign exchange risk

- The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the USD, RMB, JYP and EUR. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in foreign operations. Foreign exchange risk arises when future commercial transactions or recognised assets or liabilities are denominated in a currency that is not the entity's functional currency.

- The Group's businesses involve some non-functional currency operations (the Company's and certain subsidiaries' functional currency: NTD; other certain subsidiaries' functional currency: USD, RMB, SGD, IDR, MMK and MYR). The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

Price risk

- The Group is exposed to equity securities price risk because of investments held by the Group and classified on the consolidated balance sheet at fair value through profit or loss.
- The Group's investments in equity securities comprise listed and unlisted stocks. The prices of equity securities would change due to the change of the future value of investee companies. If the prices of these equity securities had increased/decreased by 1% with all other variables held constant, profit for the years ended December 31, 2017 and 2016 would have increased/decreased by $74 and $76, respectively. Other financial assets that have been deducted from reconciling items in stockholders' equity and recognized as profit/loss for the years ended December 31, 2017 and 2016 are $16,278 and $885, stockholders' equity for the years ended December 31, 2017 and 2016 would have increased/ decreased by $185 and $344, respectively, as a result of gains/losses on equity securities classified as available-for-sale. Available-for-sale financial assets recognized as equity adjustments for the years ended December 31, 2017 and 2016 are ($6,395) and $29,408, respectively.

Interest rate risk

- The Group's interest rate risk arises from bank borrowings. Borrowings issued at variable rates expose the Group to cash flow interest rate risk. Changes in market interest rate will change effective interest rates of bank borrowings and thus fluctuate future cash flow. As the Group's operating capital is sufficient and risk is mostly offset by cash and cash equivalents held at variable rates, the Group has assessed there is no significant interest rate shift in cash flow risk.
- The Group analyses its interest rate exposure. Based on these scenarios, the Group calculates the impact on profit and loss of a defined interest rate shift. For each simulation, the same interest rate shift is used for all currencies. The scenarios are run only for liabilities that represent the major interest-bearing positions.

- Under the Group's simulation analysis result of interest risk, if the interest rate had increased/decreased by 1% with all other variables held constant, profit for the years ended December 31, 2017 and 2016 would have increased/ decreased by $18,361 and $15,881, respectively.

Credit risk

i. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments on the contract obligations. This is described as follows:

   - The Group has assessed the credit status of counterparties when selling products and goods or services. So it expects that the probability of counterparty default is remote. The Group's maximum exposure to credit risk at balance sheet date is the carrying amount.
   - Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the Board of Directors. The utilisation of credit limits is regularly monitored.
   - Credit risk arises from cash and cash equivalents and deposits with banks and financial institutions, as well as credit exposures to customers, including outstanding receivables.
   - For banks and financial institutions, only rated parties with good ratings are accepted.
   - The endorsements and guarantees provided by the Group are all in accordance with "Regulations Governing Loaning of Funds and Making of Endorsements/ Guarantees by Public Companies". The Group knows the credit status of endorsees well and does not require any security. If there is any non-performance, the performance amount is the possible credit risk.

ii. No credit limits were exceeded during the reporting periods, and management does not expect any significant losses from non-performance by these counterparties.

iii. The ageing analysis of notes and accounts receivable (including related parties) that were past due but not impaired is calculated from the past due date as follows:

| | December 31, 2017 | December 31, 2016 |
|---|---|---|
| Up to 90 days | $ 474,429 | $ 638,161 |
| 91 to 180 days | 97,506 | 145,567 |
| 181 to 365 days | 167,665 | 336,045 |
| Over 365 days | 423,579 | 315,492 |
| | $ 1,163,179 | $ 1,435,265 |

iv. Movement analysis of notes and accounts receivable (including related parties) that were impaired is as follows:

   a. As of December 31, 2017 and 2016, the Group's notes and accounts receivable that were impaired amounted to $386,650 and $406,381, respectively.

b. Movements on the Group's provision for impairment of notes and accounts receivable (including related parties) are as follows:

| | Year ended December 31, 2017 | | |
|---|---|---|---|
| | Individual provision | Group provision | Total |
| At January 1 | $ 207,856 | $ 198,525 | $ 406,381 |
| Provision (Reversal) of impairment during the year | 36,328 | ( 48,457) | ( 12,129) |
| Write-offs during the year | ( 5,008) | - | ( 5,008) |
| Transfer during the year | 41,430 | ( 41,430) | - |
| Effect of exchange rate | ( 385) | ( 2,209) | ( 2,594) |
| At December 31 | $ 280,221 | $ 106,429 | $ 386,650 |

| | Year ended December 31, 2016 | | |
|---|---|---|---|
| | Individual provision | Group provision | Total |
| At January 1 | $ 191,893 | $ 166,025 | $ 357,918 |
| Provision of impairment during the year | - | 74,825 | 74,825 |
| Write-offs during the year | ( 11,419) | ( 148) | ( 11,567) |
| Transfer during the year | 33,974 | ( 33,974) | - |
| Effect of exchange rate | ( 6,592) | ( 8,203) | ( 14,795) |
| At December 31 | $ 207,856 | $ 198,525 | $ 406,381 |

v. The credit quality of notes and accounts receivable (including related parties) that were neither past due nor impaired was in the following categories based on the Group's Credit Quality Control Policy:

| | December 31, 2017 | December 31, 2016 |
|---|---|---|
| Type A | $ 23,382 | $ - |
| Type B | 1,794,437 | 1,823,407 |
| Type C | 1,085,224 | 973,872 |
| | $ 2,903,043 | $ 2,797,279 |

Type A: No credit limit. Clients include government institutions and government - owned corporations.

Type B: Credit limit is 130% of the average of transactions in the past year. Clients are counterparties whose average annual transactions reach NT$30,000 for the most recent 3 years and who have stable sales and optimal financials.

Type C: Credit limit is gained through assessment based on ‘Client Credit Ranking Sheet’.

(c) Liquidity risk

i. The Group invests in financial assets measured at fair value through profit or loss in active markets, so it expects to sell the financial assets in markets with prices approximate to fair value. Financial assets at cost are not traded in active markets, thus, liquidity risk is expected. However, the Group’s operating capital is sufficient to fulfill the Group’s capital needs and it does not expect significant liquidity risk.

ii. The table below analyses the Group’s non-derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities.

Non-derivative financial liabilities

| December 31, 2017 | Less than 1 year | Between 1 and 2 years | Between 2 and 5 years | Over 5 years |
|---|---|---|---|---|
| Short-term borrowings | $ 2,012,182 | $ - | $ - | $ - |
| Notes payable | 908,350 | - | - | - |
| Accounts payable (including related parties) | 3,933,294 | - | - | - |
| Other payables | 544,024 | - | - | - |
| Bonds payable | - | 200,199 | - | - |
| Long-term borrowings | - | 200,000 | - | - |

Non-derivative financial liabilities

| December 31, 2016 | Less than 1 year | Between 1 and 2 years | Between 2 and 5 years | Over 5 years |
|---|---|---|---|---|
| Short-term borrowings | $ 1,913,374 | $ - | $ - | $ - |
| Notes payable | 858,675 | - | - | - |
| Accounts payable (including related parties) | 3,461,338 | - | - | - |
| Other payables | 455,018 | - | - | - |
| Bonds payable | - | - | 477,153 | - |

iii. The Group does not expect the timing of occurrence of the cash flows estimated through the maturity date analysis will be significantly earlier, nor expect the actual cash flow amount will be significantly different.

(3) Fair value information

A. Details of the fair value of the Group’s financial assets and financial liabilities not measured at fair value are provided in Note 12(2)A.

B. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Group's investment in listed stocks is included in Level 1.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability.

C. The related information of financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities at December 31, 2017 and 2016 is as follows:

| December 31, 2017 | Level 1 | Level 2 | Level 3 | Total |
| --- | --- | --- | --- | --- |
| Assets: | | | | |
| Recurring fair value measurements | | | | |
| Financial assets at fair value through profit or loss | | | | |
| Equity securities | $ 16,933 | $ - | $ - | $ 16,933 |
| Call provision of convertible corporate bonds | - | - | 210 | 210 |
| Available-for-sale financial assets | 41,502 | - | - | 41,502 |
| Total | $ 58,435 | $ - | $ 210 | $ 58,645 |

| December 31, 2016 | Level 1 | Level 2 | Level 3 | Total |
| --- | --- | --- | --- | --- |
| Assets: | | | | |
| Recurring fair value measurements | | | | |
| Financial assets at fair value through profit or loss | | | | |
| Equity securities | $ 7,247 | $ - | $ - | $ 7,247 |
| Call provision of convertible corporate bonds | - | - | 50 | 50 |
| Available-for-sale financial assets | 63,853 | - | - | 63,853 |
| Total | $ 71,100 | $ - | $ 50 | $ 71,150 |

D. Instruments which use market quoted prices as their fair value (that is, Level 1), are using the closing prices of listed shares as market quoted prices based on characteristics of the instruments.

E. The following chart is the movement of Level 3 for the years ended December 31, 2017 and 2016:

| | 2017 | 2016 |
|---|---|---|
| Beginning balance | $ 50 | $ - |
| Additions | - | 250 |
| Gain and losses recognised in profit or loss | 160 | ( 50) |

F. Investment strategies segment is in charge of valuation procedures for fair value measurements being categorized within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model and making any other necessary adjustments to the fair value.

G. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

| | Fair value at December 31, 2017 | Valuation technique | Significant unobservable input | Range (weighted average) | Relationship of inputs to fair value |
|---|---|---|---|---|---|
| Convertible bond – call provision | $ 210 | Binomial tree pricing model | Volatility | 21.31% ~31.31% | The higher the stock price volatility, the higher the fair value |

| | Fair value at December 31, 2016 | Valuation technique | Significant unobservable input | Range (weighted average) | Relationship of inputs to fair value |
|---|---|---|---|---|---|
| Convertible bond – call provision | $ 50 | Binomial tree pricing model | Volatility | 18.12% ~28.12% | The higher the stock price volatility, the higher the fair value |

H. The Group has carefully assessed the valuation models and assumptions used to measure fair value. However, use of different valuation models or assumptions may result in difference measurement. The following is the effect of profit or loss or of other comprehensive income from financial assets and liabilities categorized within Level 3 if the inputs used to valuation models have changed:
