

One of Marketech International Corp.'s sustainability goals is to protect the environment. In addition to complying with international and local laws and regulations, the Company also emphasizes on energy conservation. We have installed solar panels at our Tainan Science Park plant to enhance our green power ratio, which will increase from 20.7% to 22.6% upon completion of the project. At the same time, we have also introduced the ISO 50001 energy management system, and we will introduce it to all of our plants in the future, depending on the effectiveness of the system.

In terms of investment, Marketech International Corp. has invested a total of NT\$96,687 thousand in the green energy industry in 2023. The investments include high-tech factory pure water and wastewater recycling system engineering and maintenance, cell material research, battery combination technology, battery management and energy storage system, high-performance separator products, etc., which can be widely used in rechargeable and all-range energy storage batteries, etc. We will also continue to invest in the related green energy in 2024, and contribute to the protection of the environment.
