

<b>MIC Strategies, Goals, and Plans for Greenhouse Gas Management</b>
<b>1. Greenhouse Gas Management Strategy</b>
In response to climate change, our company implemented the ISO 14064 greenhouse gas inventory across the entire group in 2024. We continuously monitor energy-consuming equipment and gradually promote various energy-saving and GHG-reduction initiatives to minimize the impact of our operations on the natural environment.
<b>2. Greenhouse Gas Emission Reduction Goals</b>
Achieve Net-Zero (Scope 1 + Scope 2) at customer-specific factories by 2050.
<b>3. Greenhouse Gas Reduction Plans</b>
<ul style="list-style-type: none"><li>(1) Continuously introduce and implement various energy-saving and GHG-reduction initiatives.</li><li>(2) Implement an ISO 50001 Energy Management System to reduce electricity intensity.</li><li>(3) Establish a solar power generation system in factory.</li></ul>
