

# Policy on Biodiversity

Marketech recognizes the critical importance of biodiversity to human society, economic development, and the sustainability of the natural environment. We are committed to actively protecting ecosystems, minimizing impacts on natural habitats, and promoting the responsible use of resources throughout our operations and supply chain management, thereby fulfilling our corporate responsibility for sustainability.

## Policy Objectives

1. Preserve the integrity of natural habitats and ecosystems, avoiding destruction and overexploitation.
2. Reduce the negative impacts of business operations and supply chain activities on biodiversity.
3. Respond to international standards and stakeholder expectations for biodiversity protection.
4. Integrate the concept of sustainable management to enhance corporate image and long-term competitiveness.

## Action Principles

1. **Environmental Protection:** Minimize ecological impacts throughout design, construction, and operational processes.
2. **Resource Management:** Avoid the use of raw materials sourced from illegal logging or high ecological-risk areas.
3. **Supply Chain Collaboration:** Require suppliers to comply with the Supplier Code of Conduct to jointly safeguard ecological balance.
4. **Information Disclosure:** Disclose information in accordance with international frameworks, such as sustainability reports.

## Continuous Improvement

Marketech continuously references the latest international frameworks and conducts regular reviews through ISO 14001 to reduce the environmental impacts of its operations and ensure the protection of biodiversity.
