

Environmental protection is one of Marketech sustainable goals. In addition to complying with international and local regulations in our operations, we also place significant importance on energy conservation. We have installed solar panels at our Tainan Science Park (STSP) facility to increase the company's proportion of green electricity. Upon completion, our green power ratio reached 17.8%. We have implemented the ISO 50001 Energy Management System across all our manufacturing plants in Taiwan.

Regarding energy saving and carbon reduction, we implemented six energy-saving projects in 2025 with a total investment of NT\$1.39 million to replace factory equipment. This resulted in a total electricity reduction of 82,923 kWh, achieving a carbon emission reduction of 41 metric tons of CO₂e.
