

Impact of Corporate Greenhouse Gas Emissions:**1. Regulation Compliance Risk to Corporation Due to Climate Change:**

In response to global climate change, the government has formulated climate change adaptation strategies to reduce and manage greenhouse gas emissions, fulfilling the responsibility of protecting the Earth's environment and ensuring sustainable national development. The government implemented the Climate Change Response Act in 2023. Our company respond to the government's 2050 net-zero goal. Additionally, as required by the Taiwan Stock Exchange, will disclose greenhouse gas information starting in 2026. We fully implemented greenhouse gas inventory in 2024.

2. Physical Risks to Corporation Due to Climate Change:

Climate change may cause environmental anomalies, including continuous rainfall, droughts, and sudden temperature changes, leading to increased resource usage and operational risks. Therefore, our company continuously promotes energy-saving and carbon reduction measures and monitors related energy-saving data annually.

3. Opportunities for Corporation Provided by Climate Change:

Currently, our company has implemented the ISO 14001 Environmental Management System, ISO 14064-1 Greenhouse Gas Inventory, and ISO 50001 Energy Management System. Through system monitoring and management of environmental impacts, and utilizing analysis results, we plan strategies to reduce environmental impacts. We continuously promote energy-saving and carbon reduction programs, reduce energy consumption, and actively respond to clients' and government's Net Zero goals.
